Assignment 1. Dublin Core Record

Following the instructions provided on the Dublin Core (DC) website (http://www.dublincore.org/documents/dces/), create a DC record for the textbook.

- Glushko, Robert J. (2013). The discipline of Organizing. Informatics edition.ISBN-10: 0262518503. ISBN-13: 978-0262518505 (E-book available at USF library http://ezproxy.lib.usf.edu/login?url=http://www.jstor.org/stable/j.ctt5hhbzj (Links to an external site.)Links to an external site.).

Please describe how the definitions and comments for each metadata element (http://www.dublincore.org/specifications/dublin-core/dces/) (Links to an external site.)Links to an external site.guided you in creating this metadata record. If you like, you can use this metadata generator: https://nsteffel.github.io/dublin_core_generator/generator_nq.html

Title?   [+][-]
The Discipline of Organizing

Creator?   [+][-]
Robert J. Glushko

Subject?   [+][-]
Business
Technology

Description?   [+][-]
design and deployment of Organizing Systems in
many domains, including libraries, museums,
business information systems, personal information
management, and social computing. Intended for
classroom use or as a professional reference, the
book covers the activities common to all organizing

<dc:title>The Discipline of Organizing</dc:title>

<dc:creator>Robert J. Glushko</dc:creator>

<dc:subject>Business</dc:subject>

<dc:subject>Technology</dc:subject>

<dc:description>Organizing is such a common activity that we often do it without thinking much about it. In our daily lives we organize physical things--books on shelves, cutlery in kitchen drawers--and digital things--Web pages, MP3 files, scientific datasets. Millions of people create and browse Web sites, blog, tag, tweet, and upload and download content of all media types without thinking "I'm organizing now" or "I'm retrieving now."This book offers a framework for the theory and practice of organizing that integrates information organization (IO) and information retrieval (IR), bridging the disciplinary chasms between Library and Information Science and Computer Science, each of which views and teaches IO and IR as separate topics and in substantially different ways. It introduces the unifying concept of an Organizing System--an intentionally arranged collection of resources and the interactions they support-- and then explains the key concepts and challenges in the design and deployment of Organizing Systems in many domains, including libraries, museums, business information systems, personal information management, and social computing. Intended for classroom use or as a professional reference, the book covers the activities common to all organizing systems: identifying resources to be organized; organizing resources by describing and classifying them; designing resource-based interactions; and maintaining resources and organization over time. The book is extensively annotated with disciplinary-specific notes to ground it with relevant concepts and references of library science, computing, cognitive science, law, and business.</dc:description>

<dc:rights>https://www.jstor.org/stable/j.ctt5hhbzj</dc:rights>

My notes:

1. I referred to The Discipline of Knowledge's "Forward" page by Jonathan Grudin to search out the living text book website online to get the "in sibling of" (other versions of the textbook series) as the /dc:relation.

2. I referred to The Discipline of Knowledge's "Colophon" section to obtain the /dc:source, /dc:format and /dc:type

3. I referred to The Discipline of Knowledge's "About the Author" section to obtain the /dc:contributor

4. For /dc:date I used the date of publication

5. For /dc:title, /dc:creator, /dc: subject, /dc:description and /dc:publisher, I entered what was listed on the JStor page: https://www.jstor.org/stable/j.ctt5hhbzj

 6: For /dc:coverage, I referred to the Dublin Core website regarding coverage and it states: "A jurisdiction may be a named administrative entity or a geographic place to which the resource applies" Therefore, it is web-based and print and quite possibly international

7. For /dc:rights, once again, I referred to Jstor – which can only be accessed by members

8. For /dc:identifier, I inputted the eISBN number of the publication
